PROFESSIONAL SUMMARY

Versatile developer with experience across 3 internships in Backend, Full Stack, and Advanced Python roles. Hands-on with front-end and back-end technologies including JavaScript, React, Node.js, and databases like MongoDB. Also skilled in Python and applied areas such as Generative AI, with familiarity in tools like Git and VS Code.

EXPERIENCE

Bridge For You

Backend Intern

- Developed Blogging Platform and Chat App backends using REST APIs.
- Implemented server-side logic and routing to handle content creation, retrieval, and messaging workflows.

YHills Educate

Full Stack Intern

- Designed and developed the E-learning platform EduTrack as a Full Stack intern to centralize course content and user access.
- Implemented responsive UIs for cross-device compatibility and collaborated with stakeholders to refine UX for initial product release.

AllSwift Solution

Advanced Python Intern

- Designed and implemented secure file systems using Python to improve data protection and handling.
- Developed automation scripts in Python to streamline routine tasks and increase workflow consistency.

EDUCATION

BCA-IBM

United University
GPA: 8.83/10

2026
Prayagraj

Class XII

Rama Devi Girls Inter College
GPA: First Division

SKILLS

Skills:

JavaScript • React • Node.js • Express.js • MongoDB • MySQL • Git • Generative AI • HTML • CSS • GSAP • Computer Vision • Data Science

PROJECTS

VIGILANT-AI

- Developed a multi-model detection system to identify deepfakes, misinformation, and phishing content using Computer Vision and Generative AI.
- Integrated ensemble models and heuristic filters to reduce false positives and prioritize high-risk items for review.
- Implemented modular processing pipeline to accept image, video, and link inputs for scalable analysis.

TaskFlow

- Built a collaborative Project Management API using Node.js, Express.js, and MongoDB.
- Implemented authentication and authorization with JWT to secure user actions and project resources.
- Designed RESTful endpoints for tasks, projects, and user roles to support multi-user collaboration.

Sundown Studio

- Created an animated frontend site using HTML, CSS, JavaScript, and GSAP.
- Focused on performant animations and responsive layouts to improve user engagement.
- Structured reusable components for maintainability and faster iteration.

CERTIFICATIONS

IBM Certified in Artificial Intelligence, Data Science, and Python

ACHIEVEMENTS

- Engineered a multi-model AI system to detect deepfakes and phishing links, improving digital security protocols.
- Maintained a consistent 8.83 CGPA while completing three professional internships in Python and Web Development.
- Completed back-to-back 49-day and 50-day coding challenges, solving complex algorithmic problems.
- Active member of Google Developer Group (GDG) Prayagraj; contributed to technical workshops and AI webinars.

VOLUNTEERING

- Contributor, Google Developer Group (GDG) Prayagraj — supported technical workshops and AI webinars; helped organize events and deliver presentations to local developer community.
